

Integrated Didactic and Experiential Learning

Centralize your data automatically. Focus on finding insights and driving outcomes instead of crunching spreadsheets.

The strategic **partnership of Enflux and CORE** empowers you to analyze all your data in one centralized location. Data can be your biggest asset to enhance student success and the quality of education. When it comes to taking action to drive student success, curriculum effectiveness, and overall continuous quality improvement, **data holds the key to the best action plan.**

Unlock the Potential of Your Data:

Manual data manipulation wastes time, especially when your data is spread across isolated systems. **Automatically pull data into one centralized system** of intelligence and obtain a comprehensive view of your students and the program.

Optimize Student Success:

Monitor student academic progress and outcomes and provide timely support by **identifying the challenges of at-risk students.** Evaluate student mastery of outcomes and determine their readiness for experiential learning. All while collaborating with their academic advisors and documenting student activities and interactions.

Ensure Curriculum Effectiveness:

Integrate the planned with enacted curriculum to perform an analysis of the effectiveness of the curriculum by evaluating students ongoing performance and **identifying and addressing academic gaps and redundancies.**

Actionable Insights

- Admissions
- Academic Advising
- Longitudinal evaluation of student outcomes
- Experiential and clinical learning
- Curricular effectiveness and gap analysis
- Management of assessment, accreditation, and strategic plan activities

Program Specialties

- Pharmacy Schools
- Schools of Medicine
- Colleges of Osteopathic Medicine
- Physician Assistant Programs
- Schools of Nursing
- And many more

Together, Enflux and CORE provide educators with 360° insights to support every stage of the student journey.
